The Organization of Baker University.

On the third day of February, 1858, an organization known as the Kansas Educational Association of the Methodist Episcopal Church was chartered by the Territorial Legislature of Kansas, with the privilege of locating an institution to be called BAKER UNIVERSITY, at or near the town of Palmyra. The Association soon after acquired a section of land adjoining the town site of Palmyra, known as the "College Section," the deed to which contains the following clause: "Upon the express condition that the lands herein conveyed shall be appropriated to the establishment of, and inure to the benefit of a college to be located thereon, to be established by and under the patronage of the Kansas and Nebraska Conference of the Methodist Episcopal Church, or such other Conferences of said Church as may hereafter be organized in Kansas, and not appropriated to purposes other than as above, or to private speculation."

BAKER UNIVERSITY was chartered on the 12th day of February, 1858. The institution was named "BAKER UNIVERSITY" in honor of Bishop Osman C. Baker. In the autumn of the same year her doors were opened to students, with Rev. W. R. Davis, D. D. as President. Notwithstanding all the embarrassments that have been met, regular work has been done every term, without interruption, down to the present.

As these Charters have not appeared frequently in recent Catalogues of the University, it has been deemed advisable to publish them in this edition.

CHARTER OF THE KANSAS EDUCATIONAL ASSOCIATION OF THE METHODIST EPISCOPAL CHURCH.

Be it enacted by the Governor and Legislative Assembly of the Territory of Kansas:

SECTION 1. That L. B. Dennis, A. Still, C. H. Lovejoy, Ira Blackford, W. J. Piper, T. J. Ferrill, Wm. Butt, N. Taylor, and their associates and successors, are hereby constituted a body politic and corporate, under the name and title of the Kansas Educational Association of the Methodist Episcopal Church, and by that name shall have perpetual succession, and a common seal; may sue and be sued, plead and be impleaded, defend and be defended, in any court of law or equity; and shall have full power to hold, by gift, grant, devise, purchase or otherwise, any land, tenements, hereditaments, moneys, rents, goods and chat-

tels, of whatsoever kind, which have been heretofore, or may hereafter be given, granted or devised to, or purchased by them for the benefit of said Association, and may sell and dispose of the same, or any part thereof, or lease, or rent, or improve the same, in such manner as they shall deem most conducive to the interests of said Association.

SEC. 2. That the objects of this Association are, and shall be, the promotion of education in Kansas under the patronage of the Kansas and Nebraska Conference of the Methodist Episcopal Church, or such Conference as may be hereafter formed out of said Conference within the bounds of the Territory of Kansas.

SEC. 3. That it shall be lawful for this Association to locate a University, to be called BAKER UNIVERSITY, at the town of Palmyra, or within one mile of said town: also to locate other seminaries of learning, in such places and of such grades as may be deemed best for the cause of education.

SEC. 4. That the proceeds arising from the sale of any property belonging to this Association shall be appropriated to the BAKER UNIVERSITY, as the said Association may direct, to the amount of at least three hundred thousand dollars, except such property as may be purchased or donated for other purposes.

SEC. 5. That the Association shall have the power to make all rules, by-laws and regulations necessary to carry out the provisions of this Act.

SEC. 6. That all the property or funds, real, personal or mixed, that may be received, held or appropriated, by or for said Association, for the exclusive purpose of religion or education, including a cemetery not exceeding forty acres, shall be forever exempt from taxation.

SEC. 7. That, in case any corporation shall hereafter at any time receive, by gift, grant or devise, any number of acres of land exceeding one township of land, they shall be and are hereafter required to sell and dispose of the same, within twenty-five years from the date of such gift, grant or devise; and said corporation are hereby expressly limited to the holding, at any one time, of more than one township of land, except when received by gift, grant or devise, as aforesaid, in which case they shall dispose of the same within the time aforesaid.

This Act to take effect and be in force from and after its passage.

CHARTER OF BAKER UNIVERSITY.

Be it enacted by the Governor and Legislative Assembly of the Territory of Kansas:

SECTION 1. That L. B. Dennis, Ira Blackford, Charles H. Lovejoy, Walter Oakley, N. Taylor, Homer H. Moore, James Shaw, Curtis Graham and William Butt, of the Kansas and Nebraska Conference of the Methodist Episcopal Church, and such other persons as shall, or may hereafter be appointed by the Kansas Conference, or subdivisions of the said Kansas Conference of the said Methodist Episcopal Church, to succeed them, be, and they are hereby created and constituted a body politic and corporate, under the name and style of The Trustees of the BAKER UNIVERSITY, and henceforth shall be styled and known by that name, and, by the name and style, to remain and have perpetual succession, with power to sue and be sued, to implead and be impleaded; to acquire, hold and convey property, real, personal or mixed, in lawful ways; to have and use a common seal, and to alter same at pleasure; to make and alter from time to time such by-laws as they may deem necessary for the government of said institution, its officers and servants: Provided, Such by-laws are not inconsistent with the constitution of the United States and the organic Act; and to confer on such persons as may be considered worthy, such academical or honorary degrees as are usually conferred by similar institutions.

SEC. 2. That the term of office of said Trustees shall be four years; but they shall hereafter, at the regular Annual Conference aforesaid, in 1859, so arrange by lot that the term of office of one-fourth of their number shall expire annually; and said board shall, in the manner above specified, have perpetual succession and shall hold the property of said institution solely for the purpose of education, and not as stock for the individual benefit of themselves, or any contributor to the endowment of the same. No particular religious faith shall be required of those who become students of the institution. Nine members shall constitute a quorum for the transaction of any business of the Board, except the election of President or Professor, or the establishment of Chairs in said institution, and the enactment of by-laws for its government, for which the presence of a majority of the Board shall be necessary: Provided, That the Trustees, hereafter selected, shall not exceed thirty-two in number, who shall be fairly appointed among the respective Conferences having the selection thereof, as hereinbefore provided.

SEC. 3. That the said Annual Conference of the Methodist Episcopal Church under whose control and patronage said University is placed, shall each also have the right to appoint annually, two suitable persons, members of their own body, visitors to said University, who shall attend the examination of students, and be entitled to participate in the deliberations of the Board of Trustees, and enjoy all the privileges of members of said Board, except the right to vote.

SEC. 4. That the said institution shall be, and hereby is, permanently located at Baldwin City, in the Territory of Kansas, and the corporators and their successors shall be competent, in law or equity, to take to themselves, in their said corporate name, real, personal or mixed estate, by gift, grant, bargain and sale, conveyance, will, demise or bequest, of any person whatsoever; and the same estate, whether real, personal or mixed, to grant, bargain, sell, convey, demise, let, place out at interest, or otherwise dispose of the same, for the use of said institution, in such manner as to them shall seem most beneficial to said institution. Said Corporators shall faithfully apply all the funds collected, as the proceeds of the property belonging to the said institution, supporting the necessary officers, instructors, servants and agents, and procuring books, maps, charts, globes and philosophical, chemical, and all other apparatus necessary to the success of said institution, under the restrictions imposed: Provided, nevertheless, That, in case any donation, demise or bequest shall be made for particular purposes, accordant with the design of the institution, and the corporation shall accept the same, every such donation, demise or bequest shall be applied in conformity with the express conditions of the donors or devisors: Provided further, That said corporation shall not be allowed to hold more than two thousand acres of land at any one time, unless the said corporation shall have received the same by gift, grant or demise; and in such case they shall be required to sell or dispose of the same within ten years from the time they shall acquire such title, and on failure to do so, such land, over and above the before named two thousand acres, shall revert to the original donor, grantor, devisors or their heirs.

SEC. 5. That the treasurer of the institution, and all other agents, when required, before entering upon the duties of their appointment shall give bond for the security of the corporation, in such penal sum and with such securities as the corporation shall approve; and all processes against the corporation shall be by summons, and the service of the same shall be by leaving an attested copy thereof with the treasurer at least sixty days before the return day thereof.

SEC. 6. That the corporation shall have power to employ and appoint a President or Principal for said institution, and all such Professors or Teachers, and all such agents or servants as may be necessary, and shall have power to displace any or such of them as the interest of the institution may require; to fill vacancies

which may happen by death, resignation or otherwise, among said officers or servants; and to prescribe and direct the course of studies to be pursued in said institution, by and with the advice and consent of the President and Professors thereof.

SEC. 7. That the corporation shall have power to establish Departments for the study of any and all the learned and liberal professions in the same, to confer the degrees of Doctor in the learned arts and sciences and belles letters, and to confer such other academical degrees as are usually conferred by the most learned institutions.

SEC. 8. That the said institution shall have power to institute a Board of competent persons, always including the Faculty, who shall examine such individuals as may apply, and, if such applicants are found to possess such knowledge pursued in said institution as, in the judgment of said Board, renders them worthy, they may be considered graduates in course, and shall be entitled to diplomas accordingly on paying such fees as the corporation shall affix; which fee, however, shall in no case exceed the tuition bills of the full course of studies in said institution. Such Examining Board may not exceed the number of ten, three of whom may transact business, provided one be of the Faculty.

SEC. 9. That, should the corporation at any time act contrary to the provisions of this charter, or fail to comply with the same, upon complaint being made to proper court of the county in which said University is situated, a *scire facias* shall issue, and the proper attorney shall prosecute in behalf of the people of the Territory for forfeiture of this charter. This act shall be a public act, and shall be construed liberally in all courts, for the purpose herein expressed.

ADMISSION.

All candidates for admission must present satisfactory testimonials of good character. Those coming from other schools must present evidence of honorable standing in the institution from which they come, and must evince their qualification for the class they propose to enter. Persons seeking admission to any of the College classes must pass an examination on the preceding studies of the course, unless they can present satisfactory grades from the institution they have previously attended.

Students presenting certificates of good standing, officially signed by the Principal or Board of Education of any city of the first or second class in the State, will be admitted, without further examination, to the class which they are prepared to enter.

All new students from high schools and colleges are urged to bring their grades and present them at the time of enrollment.

All students must enroll with the President. This enrollment will be accepted as a positive and explicit agreement on their part to observe all the rules and regulations of the University. None will be admitted to the classes except on presentation of receipt for tuition and incidental fee for the current term.

Examination for admission will be held on Tuesday, at the opening of the school year, commencing at 9 o'clock A. M.

Remarks on the Courses of Study.

The Collegiate Courses of Study, preceded by Preparatory instruction, are believed to represent the views of the leading educators of the age respecting those studies best adapted to secure to the student the highest mental and moral culture.

In arranging the Courses of Study, the object has been to subserve the best interests of the pupil. The completion of any course will require hard study, but will secure the desired result—mental strength, knowledge, and fitness for life's work.

CLASSICAL COURSE.—The present Classical Course will compare favorably with that laid down by similar institutions of greater age and more resources. It is marked by the prominence given to the ancient classics. It embraces those branches of study found by experience to secure the closest application, best habit of study, greatest precision of thought, most harmonious and symmetrical development of all the intellectual faculties. All students who can possibly do so are advised to take the full Classical Course.

SCIENTIFIC COURSE.—This Course is arranged for the benefit of those who do not desire to give so much study to the Ancient Languages. It differs from the Classical in having more Mathematics and Science, dropping the Greek, and adding German.

LITERATURE AND ART COURSE.—This has been arranged to accommodate young ladies who desire to devote themselves mainly to English studies and the arts. Enough solid studies are required to secure good mental drill, and broad scope is given for selecting from the Departments of Language, Music, and Art.

ACADEMIC DEPARTMENT.—In providing this Course it has been the design to prepare, to the best degree, for Collegiate study and instruction; yet, at the same time, nothing is lost in the way of systematic mental culture, even if the student can carry his work no farther. To meet the demand of students who desire to review the common branches or do not possess the requisite qualification to take up the graded work of the Department, classes will be formed each term in Arithmetic, English Grammar, Descriptive Geography, and United States History; but such classes are subject to the rule requiring at least six applicants for the formation of a class.

It will be observed that the work is graded to meet the coordinating courses in the Collegiate Department; and to further this successfully, experienced teachers have control of all class work, in many cases the College professors being in charge. With the changes recently made in the courses of study, this Department invites comparison with any kindred institution with regard to scope and character of work.

To mark the completion of this work and the individuality of the Department, graduating exercises are held during Commencement Week, the conditions of graduation being the same as admission to Freshman Class.

NORMAL COURSE.—This Course, extending through three years, is intended to meet the wants of those fitting themselves for teaching, who, for want of time or pressure of circumstances, cannot complete one of the longer courses. A series of lectures will be given the coming year upon topics that are peculiar to the work of the teacher. During the third year the pupils will be required to take charge of classes and conduct recitations in the presence of the regular teacher.

BIBLE STUDY.—Modern civilization in its noblest developments, is confessedly a Bible civilization. The Bible contains those principles which have revolutionized the world. A volume which has been productive of such beneficent changes, challenges the attention of scholars and thinkers universally. It is wise to give the youth a systematic instruction in this Book preeminent. As a study in English, poetry, history and profound philosophical principles, the Bible is nonpareil. It is therefore proposed to give such attention to the study as will furnish each student a view of this sublime volume in its entirety. The result can be but good.

ELECTIVE STUDIES.—Students in the Literary Course may take both Drawing and Music, or Painting and Music, when there are but two required studies.

CHAPEL ORATIONS.—Sophomores are required to deliver one Chapel Oration in the Spring Term, Juniors one in each Term and Seniors one in the Fall Term and one in the Winter Term. In making up the students' grades each oration is counted as a study.

Blow-pipe Analysis.....	1 50
Histological Botany.....	2 00
Qualitative Analysis.....	2 00

Music and Art are extra, and the charges are stated in the announcements of these departments. All charges are due and must be paid in cash at the opening of each term. Students taking more studies than the number required in the catalogue for the term will be charged \$1.00 for each additional study. A student taking only one study will be charged one-half the regular rates for the term. Rebate will be granted in case of protracted sickness. A non-negotiable certificate will be given, which will be accepted from the holder as a credit on tuition at any time afterward. Rebates are made on the basis of rates by the term. Applications for rebates must be made to the faculty in writing within thirty days from the date of discontinuance of attendance.

Expenses for Board.

Board in private families with furnished rooms, light and fuel, per week, \$2.75 to \$3.50. Club rates, including room rent, \$2.00 to \$2.50. Club rates, exclusive of room, \$1.75 to \$2.00. Self-boarding from \$1.00 to \$2.00.

Incidental Expenses.

A small allowance should be made for incidental expenses. These vary greatly, according to the habits of the student.

Parents are admonished not to furnish too much spending money for miscellaneous purposes. Young men and women should be taught the lesson of economy. The merchants of Baldwin are hereby earnestly requested to refuse credit to young students, without instruction from the parents or guardians.

Departments of Instruction.

MENTAL, MORAL, AND POLITICAL SCIENCE.

Studies in these branches are mostly in the Senior year. The subjects included are Political Economy, Psychology, Ethics, Logic, History of Civilization, Aesthetics, Philosophy of History, Christian Evidences, History of Philosophy and Theism. In teaching the subjects, the aim is to stimulate thought and to induce research and investigation. As a means to this end, students are required to write criticisms and reviews of the text, and to present original productions on themes selected from the subjects under consideration.

Discussions in the class are allowed, and students are encouraged to form opinions for themselves. While a text-book is used as a basis for the study, it is not designed to confine the student to that alone. Power to think for one's self is esteemed of greater importance than simply to be able to recite the thoughts of another.

GREEK LANGUAGE AND LITERATURE.

The study of Greek is in the highest sense beneficial. It requires closeness of attention and application, and therefore must be conducive to the highest intellectual development.

In the beginning classes, especial attention is given to etymology and syntax, and in the more advanced classes the subject matter and style of authors read will be discussed. Lectures on Mythology, Antiquities, Art and Philosophy, will be delivered during the year.

Written accent is taught, and Greek prose composition will receive due attention. The Greek vocabulary of science will be taught, and the Greek conversational method will be used in the class room. Sight reading will also be made a specialty.

NATURAL SCIENCE.

In this department, so far as possible, the text-books have been merely guides to original investigations by the students. Such study elicits more thorough work from the student, and leads him to think for himself far more than the conning and recitation of a few pages.

In Preparatory classes, the following studies were pursued: Physical Geography, Physics, Physiology and Hygiene, and Astronomy.

In Physical Geography, while a thorough knowledge of the essential portions of the text was required, the text was used to a great extent simply as a guide to a wider study of the subject. To that end, a thesis of 1,000 words, upon some topic relating to the subject, was required of each pupil.

The physical laboratory being supplied with sufficient apparatus for clearly explaining all the principles of the science, Physics was taught largely by experiment, the simpler experiments being performed by the pupils, the more complex by the demonstrator before the class, in each case the student being required to make careful note of all phenomena and explanation of principles involved.

In Physiology and Hygiene special attention was given to the location, description and functions of each organ of the body, and the laws which govern its normal action. Besides illustration with the human skeleton and manikin, frequent dissections of different organs were made before the class.

The class in Astronomy, besides the text work, was taught to recognize the principal stars and constellations.

The Freshmen, during the fall term, took up the study of Physiology. Each pupil was required to dissect one or more mammals, take notes of work and report. During the spring term the class pursued the study of Botany. This subject was taught by means of lectures, with a very marked degree of success over previous years. Each

member was required to present an herbarium of fifty correctly mounted and analyzed specimens.

The Sophomores commenced the year with Chemistry. Two days of each week were devoted exclusively to the laboratory work. Each pupil was required to perform a series of experiments, noting carefully all phenomena, writing the reactions, and keeping notes of all work performed. The winter term was spent entirely in the laboratory. Each member was required to determine by blow-pipe and wet analysis the composition of fifty substances. The study of Orton's Comparative Zoology was pursued during the spring term. A very complete collection of birds, mammals and marine invertebrates enabled the class to verify much of the text.

The Juniors devoted the fall, winter and spring terms to Physics. They took up for the fall and winter terms the subjects of Hydrostatics, Pneumatics, Optics, Heat, and Acoustics, making quite extensive experimentation in each. The class devoted its entire time during the spring term to Electricity, making quite exhaustive researches in the subject.

The Seniors gave the first six weeks of the fall term to Mineralogy. The first two were devoted to lectures, and the remainder to the determination of minerals by the use of the blow-pipe. The remainder of the fall and winter terms was devoted to Geology. The nature of the locality enabled the class to make several interesting geological excursions. The cabinet of several thousand specimens illustrates well all the geological epochs.

GERMAN.

German is a required study for scientific and literary students throughout the Senior Academic and Freshman years. The first year is devoted to a study of the Grammar and Reader, accompanied by exercises in conversation and composition. Translation into German is made prominent, and the German script is learned and used.

In the second year the study of the Grammar is continued with increased attention to etymology. The class reads Schiller's *Wilhelm Tell*, Goethe's *Iphigenie auf Tauris*, and German prose in the form of a modern novel. In the last half of the course, a work on German composition is introduced. A text on German Literature and one on German History accompany the course.

HISTORY.

In the Academic Department two terms are given to United States History and one year to General History. Maps, charts, and essays are prepared; and the text is enlarged by parallel reading.

In the Collegiate Department, the History of Civilization, English History, and the Philosophy of History are studied. While in the academic years, the leading facts of history are acquired, these in the collegiate years, are supplemented by more extensive reading and by a profounder study of the philosophy of events. The library is constantly growing in historical works, and such means are now at command as will develop and foster the historical spirit.

ENGLISH.

Grammar, Rhetoric and Composition are studied in the Academic Department. The principles learned are put into practice in exercises and essays, for it is recognized that the ability to prepare a neat and correct manuscript must be acquired in the early part of a student's course. This work, however, is not purely mechanical, but furnishes opportunity for the expression of thought and leads to the appreciation of fine thought.

The Sophomores continue the study of Rhetoric, using D. J. Hill's Science of Rhetoric. Essays and illustrative reading are required. The course in English Literature follows and extends over one year, being preceded by a term of English History. In addition to a general survey of English and American Literature, a number of the masterpieces of the language are critically read. Chaucer, Spenser, Shakespeare, Milton, Addison, Arnold, Tennyson were studied during the last year in some leading productions. Essays, orations, and debates are required at frequent intervals.

ELOCUTION.—Elocution aims to develop and train the voice in compass, sweetness and power; the body in grace and vigor, and the face in mobility and expressiveness. These all become factors in expressive delivery.

ORATORY.—Oratory consists of two distinct parts, matter and delivery, the latter falling chiefly in the domain of elocution. Oratory, therefore, has to do chiefly with the larger and more difficult work of preparing the address, speech or oration. As means to this end there will be: First, a series of lectures on the principles of public speaking; Second, an analysis of some of the masterpieces of Webster and Burke; Third, training in the preparation of addresses, and drill in the delivery of the same. The law underlying all work in this department is, that we *learn to speak by speaking*, and not merely by eulogizing famous orators and their orations.

MATHEMATICS.

In this department, preeminently, must efficient work be based on thoroughness in fundamental principles and operations. Accordingly,

students are urged to make a careful preparation in Arithmetic before attempting subsequent work; likewise for the same reason an additional term has been added the past year to the course in Algebra, and increased attention is given to this important branch. Final work of an advanced character is reserved for the Sophomore year when with more maturity of mind higher Algebra may be read more satisfactorily.

A full year is given to Geometry, and the prominent aim is to develop logical power, clear conceptions, and accurate language, to which end the benefits of Geometry are unsurpassed. More original and inventional work also has been performed the past than any former year, and the practical applications of the study are not overlooked.

The course has likewise been lengthened in Trigonometry, Surveying and Analytic Geometry, and better opportunities will be afforded in each of these in the future than in the past. The chain, compass, and transit have been in frequent use by every member of the classes in Surveying, and commendable facility has been attained in the use of these instruments, as well as in the solution of practical problems in which they are employed. For a number of years each class has done more field work than any of its predecessors, and as rapidly as additional appliances can be procured, it is proposed to continue this improvement and to prepare our students as fully as possible for the practical employments of civil engineering.

The course has been strengthened by the addition also of an elective term in Mechanics and Integral Calculus. Differential Calculus is now required for all scientific students and the classes are increasing in number, as well as in appreciation for this powerful instrument of research.

Astronomy, though less practical (in the narrow and popular use of the term) than most sciences, nevertheless presents rare advantages in the culture of the imagination, and in the development of broader and higher concepts. As soon as a suitable telescope has been procured still greater attention will be given to this interesting and ennobling science. In this, as well as the pure mathematics, a careful selection of text books is made, and it will be the constant aim to approximate as nearly as possible the disciplinary value, practical utility, and general culture that properly attend the study of mathematics.

LATIN LANGUAGE AND LITERATURE.

Five full years are given to the study of Latin. The aim of the instruction during the first three years, is to insure a thorough knowledge of the forms and laws of the language.

Prose composition is continued, in connection with Cæsar, Nepos, and Cicero, during five terms. Mythology and the principles of versification are pursued two terms in connection with Virgil.

In the college proper Latin extends through the Freshman and Sophomore years. In connection with Livy, attention is given to Roman History. Horace occupies two terms; in this connection are also studied Roman Antiquities and the leading facts in the history of Roman Literature. The Sophomore year includes Quintilian, Juvenal, Plautus and Tacitus. Lectures on the Ancient Drama will accompany the reading of Quintilian. The aim of the whole course is to give the student an exact knowledge of the language and a broad and intelligent view of Latin Literature in connection with ancient customs and the proper historical surrounding.

Department of Music.

F. N. HAIR, Director.

This department affords superior advantages for the study of music in all of its branches. The course of study has been carefully graded, and the general plan is that of the best European and American conservatories. The increased interest of the public has demonstrated its appreciation of the effort to secure to students a thorough musical education. Instruction will be given in Piano-forte and Organ playing, and in Voice Culture, Harmony, Counterpoint and Composition.

The Director of the Department will give a number of Piano-forte Recitals and Lectures during the school year, and there will also be recitals by the pupils.

A Choral Class will be formed and conducted by the Director of the Department.

Course of Study.

PIANO-FORTE—FIRST GRADE.

Lebert and Stark, Stuttgart Conservatory Method, Book 1.

STUDIES.—Selected studies from Lœschorn, Op. 84 and 65; Kohler, Op. 50; Gurlitt, Duvernoy, Emery, Baumfelder, etc. Sonatinas by Sternberg, Lenz, Kohler, Emery, Clementi and Kuhlau.

PIECES.—Kullak, Sternberg, Baumfelder, Emery, Marston, Kirchner, Lichner and others.

PIANO-FORTE—SECOND GRADE.

Lebert and Stark, Stuttgart Conservatory Method, Book 2, Part 1 and 2.

STUDIES.—Buttschardt, Method of Technique. Heller, Op. 47 and 45. Technical work by Hair. Sonatas by Merkel, Clementi, Haydn, Mozart and Beethoven.

PIECES.—Mendelssohn, Dupont, Preyer, Rummell, Sternberg, Kullak, Emery, Schumaun, Marston, Lynes and others.

PIANO-FORTE—THIRD GRADE.

Lebert and Stark, Stuttgart Conservatory Method, Book 2, Part 3 and 4.

STUDIES.—Moscheles, Preludes Op. 73; Bach, Six Preludes; Bach, 2 and 3. Part Inventions; Heller, Op. 46; Wollenhaupt, Op. 22; Cramer, Selected Studies (Bulow). Technical Work by Hair. Preyer, Octave Studies. Sonatas, by Beethoven, Mozart, Haydn.

PIECES.—Paderewski, Seiss Barali, Preyer, Phillip Scharwenka, Brassin, McDowell, Chopin, Foote, Heller, Henselt and others.

PIANO-FORTE—FOURTH GRADE.

Lebert and Stark, Stuttgart Conservatory Method, Book 3, Part 1 and 2.

STUDIES.—Bach, English and French Suites; Mendelssohn, Seven Character-pieces; Clementi, Gradus ad Parnassum (Tausig); Heller, Op. 16 (Art of Phrasing); Kullak, Octave Studies; Tausig Daily Studies; Bach, Italian Concerto; Rheinberger, Fugue in G minor. Technical work by Hair. Sonatas by Beethoven, Grieg, Schumaun.

PIECES.—Sgambati, Nicode, Saran, Jadassohn, Raff, Rubinstein, Dvorak, Scarlatti, Bach, Chopin, Reinecke, Moszkowski, Gottschalk, Rheinberger and others.

PIANO-FORTE—FIFTH GRADE.

Lebert and Stark, Stuttgart Conservatory Method, Book 3, Part 3 and 4.

STUDIES.—Bach, Well-Tempered Clavichord; Saran Op. 2, Phantasie-pieces; Moscheles, Op. 70; Handel, Selected Suites; Bach-Liszt, Fugue in A minor; Chopin Studies, Op. 10. Technical Work by Hair.

PIECES.—Liszt, Droyschock, Rubinstein, Raff, Chopin, Brassin, Schumann, Grieg, Dvorak, MacDowell, Foote, Reinecke, Moszkowski, Mendelssohn and others. Works for two piano-fortes by Moscheles, Chopin, Saint-Saens, Mendelssohn, and Grieg.

PIANO-FORTE—SIXTH GRADE.

Lebert and Stark, Stuttgart Conservatory Method, Book 4.

STUDIES.—Chopin Studies, Op. 25; Henselt Etudes; Liszt, Preludes. Schumann, Etudes Symphoniques; Bach, Well-Tempered Clavichord; Bach-Liszt, Fantasies and Fugue in G minor. Concertos by Beethoven, Bronsart, Grieg, MacDowell, Schumann, Raff, Chopin, Henselt, Mendelssohn, Liszt, and Sgambati.

PIECES.—Wagner-Brassin, Brahms, Liszt, Chopin, Tschaikowski, Saint-Saens, Rheinberger, Wagner-Liszt, Sgambati, Nicode, Dvorak, and MacDowell.

HARMONY—COUNTERPOINT AND COMPOSITION.

Every musician, whether amateur or professional, ought to have a practical knowledge of these important duties, and pupils are earnestly requested to take at least a one year's course in Elementary Harmony. Richter's Manual of Harmony, Emery's Elements of Harmony, Parker's Treatise on Harmony, Richter's Manual on Counterpoint, and Bussler-Cornell's Musical Form, are the text books used.

LESSONS BY MAIL IN HARMONY, COUNTERPOINT AND COMPOSITION.

This rapid and interesting method of studying the above branches is constantly gaining in public favor, and all correspondence students bear testimony as to its thoroughness and efficiency.

Rates of Tuition.

PIANO-FORTE, ORGAN OR VOICE.

Private Lessons twice a week.

Fall term, 30 min. duration.....	\$24.00;	20 min. duration.....	\$20.25
Winter term " " "	19.50;	" " "	16.50
Spring term " " "	18.25;	" " "	15.75

HARMONY, COUNTERPOINT OR COMPOSITION IN CLASS.

Fall term, twice a week	\$16.00;	once a week.....	\$9.75
Winter term " "	13.25;	" "	8.25
Spring term " "	12.25;	" "	7.75

Private Lessons in Harmony, Counterpoint or Composition same as Piano-forte, Organ or Voice.

General Rules.

A careful examination of the following regulations is requested of all who desire to enter this department.

All students, on entering the Music Department, must obtain a matriculation card from the President of the University, and be subject to all the rules and regulations of the institution; but all business arrangements, forming of classes, changing of lesson hours, paying of tuition, must be transacted with the Director of Music Department.

Tuition payable strictly in advance for the entire term.

Pupils entering the third grades of courses in Piano or Voice are *required* to study Harmony, unless special arrangements are made.

Sheet music will be sold at a liberal discount.

A statement of sheet music, etc., will be sent to pupils at the end of each month, and it is expected that all such bills will be paid promptly.

Pupils will not be received for less than one term, or the unexpired portion of the term remaining after entrance.

The department *does not* furnish instruments for practice, but will gladly assist pupils in securing the use of pianos.

Concert Grand Piano will be used during the school year.

No deduction for temporary absence, nor for lessons discontinued, except in cases of protracted illness, when the department will share the loss with pupil. For further information, address

F. N. HAIR,

Music Department, Baker University,

Baldwin, Kansas.

Art Department.

Educational and Decorative Art.

METHODS OF TEACHING.—That branch of art which appeals directly to our senses through the eye may be considered under three general classes, viz: Outline, Light and Shade, Color. In this order the work is being pursued. When the pupil can draw in outline readily, models in various positions, he may continue in outline work from casts, still-life groups, flowers and fruit, or work in light and shade from models. Having completed the course in this grade he may turn his attention to the study of Color. The models, casts and studies used in the studio are furnished without extra expense to the pupil.

WHY LEARN TO DRAW?—In entering upon the study of any subject, we should seek first that underlying principle which insures a solid foundation. In Art, that principle is Free-hand Drawing; and the student who neglects this part of the work, fails to find the practical worth or the highest enjoyment that might be attained by original work in Art.

Similar reasons might be presented why the pupil should study Mechanical Drawing. A good knowledge of Industrial Drawing may be made practical in the school room, at home, and in every department of industry.

It is difficult to find a class of students in any department of the College more devoted to their work. The regular course covers three or four years, according to the time spent daily in the Art room.

The Baker University Art League meets every alternate Wednesday afternoon. A regular program, consisting of subjects from Graphic Art, Ancient and Modern Artists, and their works, is carried out at each meeting. Every art student is entitled to the privileges of the League during the time he is connected with this department.

It is desirable that students enter at the beginning of the term, but they will be received at any time.

Lesson hours: Tuesday, Thursday and Saturday afternoons.

Pupils are expected to work every (school) day-afternoons.

All day work can be arranged for.

Course of Study.

FIRST YEAR.

FALL TERM.

Form—Outline in pencil from models, casts and still-life groups.
Plant-form—fruit, flowers, etc.
Geometric drawing.
Light and shade—from models, casts and still-life.

WINTER TERM.

Light and shade—crayon saucer or point from still-life groups.
Crayon (landscape) from copy.
Botanical Analysis.
Time sketches.

SPRING TERM.

Light and shade—sepia, crayon point or Indian ink, from models, and still-life groups.
Botanical Analysis, with applied design.

Normal instruction. Time sketches.

SECOND YEAR.

FALL TERM.

Color—Theory and harmony.
Water Color—from fruit, flowers, etc.

Out-door sketching.

WINTER TERM.

Historic ornament.
Ancient Art.
Water color, from still-life and copy.

SPRING TERM.

Medieval and Modern Artists, and Schools of Art.
Out-door sketching in crayon.

THIRD YEAR.

FALL TERM.

Anatomical drawing.
Figure drawing from studies
Oil painting from still-life.

WINTER TERM.

Figure drawing from studies and casts.
World's noted Art Galleries, and works of the greatest artists.
Oil Painting, from still-life.
Time sketches.

SPRING TERM.

Figure drawing from antique and from life.
Portrait work from colored studies and cabinets.
Time sketches.

FOURTH YEAR.

FALL TERM.

Oil Painting—still-life and landscape.
Portraits in oil from cabinet.
Sketching.
Decorative work—wood carving, China painting, etc., or mechanical—Geometric, orthographic and perspective.

WINTER TERM.

Portrait—from life, or Mechanical—perspective and building construction.
Oil or water color painting.
Time sketches.

SPRING TERM.

Sketching—oil or water colors.
Portrait or Mechanical—machine drawing.
Time sketches.

Rates of Tuition.

By the term.....	\$11.00 to \$16.50
By the week.....	2.00 to 3.00
By the lesson.....	.50 to .75

Double rates for all day work.

Requirements.

Tuition must be arranged for within the first two weeks.

All students, before registering in the Art Department, must present a matriculation card from the President of the University, and be subject to all rules and regulations of the institution.

Students should work in the studio at least two periods (of 50 minutes each) each day.

No reduction for absence, nor lessons made up, except in cases of protracted illness.

Students must arrange to have their work accessible for the annual exhibition during Commencement week.

All contemplating the study of Art are cordially invited to call on me personally at the Studio, or address by mail.

NELLIE A. HEWINS, Instructor.

Commercial Department.

PROF. SAMUEL E. ROBERTSON, Principal.

MISS MABEL BROCKETT, Stenography and Type-Writing.

MR. W. N. SIMPSON, Penmanship.

There has been such a demand for a practical business course that the authorities have established a full Commercial Department requiring one year to complete it. Prof. S. E. Robertson, for six years a successful instructor in the leading Business College of Topeka, has been secured as principal. He is enthusiastic in his work, and will give as good instruction and discipline as can be secured anywhere. There are advantages in taking a Business Course in connection with a regular College. The use of Library, privileges of the Literary Societies, popular lectures and association with pupils in various departments, greatly enhance the desirability of taking a Business Course in a regular College. The success of this department during the past

year has been most gratifying. More students have elected business studies than before.

Regardless of the brief period since this Department was established, a large per cent. of the graduates are holding responsible and paying positions. While others have been inspired to enter other departments of College work that they may become qualified for the very highest callings in the great profession of business.

The Course of study has been revised and strengthened.

Additional assistance is employed, and for the coming year better work will be done than any before.

Branches Taught.

PENMANSHIP.—There is no pursuit in life that can ignore penmanship. Legible, accurate, rapid business writing, is indispensable to the world. We have had students enter this department who were confident they could never learn to write, but we have never failed in teaching them to write a beautiful business hand in a few months. No young man of limited means can have a better capital with which to commence life than a good handwriting. Instructions will be given in ornamental penmanship when so desired.

BOOK-KEEPING, as is the case in all courses of commercial study, constitutes the frame-work of the business course. The financial failure of a large number of business men can be attributed to ignorance of the science of accounts. New classes in this branch are organized at the beginning of every term. The entire school year is devoted to the study, thus enabling the student to become thoroughly conversant with both single and double-entry. Every one that completes the full course will be thoroughly prepared to enter upon the practical duties of an accountant.

BANKING.—Special attention is given to this branch of Book-keeping. The student is first thoroughly drilled in the principles and forms of books used. Following this, he puts into practice what he has learned by receiving deposits, paying checks, collecting notes and drafts, issuing certificates, drawing bills of exchange, and, in fact, performing all the duties devolving upon one engaged in the banking business. It is here that the student receives the finishing touches in the course of training required to polish and perfect him as an accountant.

PRINCIPLES AND PRACTICE OF BUSINESS follows the course of book keeping. The student here handles his money, makes out notes, drafts, checks and statements. Every paper that should be required

in business has its place here. The work as performed in our leading offices and counting-rooms is here duplicated. Every transaction is guarded, and not passed over until *thoroughly* understood.

COMMERCIAL LAW.—It is certainly necessary for all to have some knowledge of points of law pertaining to business. We do not claim to make lawyers of our students, but we do claim to give them a knowledge of the principles of law whereby they may be able to protect their own interests.

All points of law pertaining to business are fully and clearly brought before the student in the pursuing of this study.

COMMERCIAL ARITHMETIC.—This indispensable branch of business education forms the very foundation of business enterprise and success.

In this age of progress it is necessary for the man of business to make calculations in the most rapid and accurate manner. Such thorough and protracted drill is given as will answer both accuracy and rapidity. All the important abbreviated methods are used in giving instruction in this branch.

ENGLISH GRAMMAR.—This important branch receives special attention. Analyzing is made the basis of all the work.

The exercises in Diagraming, Analyzing, Sentence-building and in impromptu Composition, give an interesting variety to the study. Capitalization, punctuation and use of proper language, are also carefully and thoroughly taught.

RHETORIC.—Following a thorough course in English Grammar the student is advanced to the study of Rhetoric.

No one should be more pains-taking in acquiring a clear, concise style of writing than the man of business.

Blunders in construction, or want of taste in the expression of thought often interferes with success in the world of business.

The study is presented in a way peculiar to the wants of the Commercial student.

POLITICAL ECONOMY.—Large amounts of hard-earned money are finally lost by poor management, defective plans and short-sightedness. These defects can all be remedied by securing a knowledge of Political Economy. With a proper conception of this study, the student, on entering a practical life, is enabled to see and steer clear of the difficulties which cause so many shipwrecks in the financial world.

BUSINESS CORRESPONDENCE.—The subject of letter-writing is thoroughly classified, embracing forms and matter. No drill the pupil receives can be made of more practical utility than a thorough knowledge of the common courtesies, forms and methods, in correspondence. A knowledge how to arrange and compose a good business letter is an accomplishment with which everyone expecting to enter business circles should be familiar.

CIVIL GOVERNMENT.—The time has come when the man of business must understand the history, purposes, philosophy, and plan of the general government. The safety of the country depends largely on the intelligence of the people as to the various forms and objects of government. For this reason Civil Government has been attached to the course.

BUSINESS SPELLING.—He who cannot spell is regarded as an ignorant; hence, the importance of this study. A large collection of words used in business has been arranged for this branch. The students write their spelling lessons, thus training at once the eye, hand and brain, to do the work so often done in a life time.

BUSINESS PAPERS AND LEGAL BLANKS.—In this branch the student is instructed how to make out in legal form, under the instruction of a competent teacher, Deeds, Notice to Tenant to Quit Premises, Mortgage on Personal Property, Satisfaction and Release of Mortgage, Agreement (general form), Mechanics Lien, Bill of Sale, Notice, Property Statement, Lease Farm Property, Mortgage (standard), Lease (general form), Bond for Deed, and all other important legal papers.

DETECTION OF COUNTERFEIT MONEY.—Any one receiving a piece of counterfeit money, according to business rules, makes good the loss. The student is here instructed how to tell a genuine piece of money from a counterfeit. Though some may imagine that but few counterfeits exist now, the total of counterfeit money captured and secured during one year was \$8,830,125.

MARKING GOODS.—An accomplishment easily learned, and at the same time very useful, especially to those expecting to engage in clerical work.

LECTURES AND ILLUSTRATIONS.—The student is expected to attend all class lectures. These lectures are given by a practical accountant, who fully illustrates all business customs and usages. Much valuable information is here acquired that cannot be had from any text.

BIBLE STUDY.—Students in the Commercial Department are allowed the privilege of meeting with the class for systematic Bible study one hour each week during the entire year.

DIPLOMA.

Students having completed the entire Commercial Course, and satisfactorily passed all written and oral examinations, will be awarded diplomas. A diploma is also granted from the Book-keeping Department to those who have made a specialty of this Branch, and have complied with the necessary requirements.

Shorthand and Type-Writing.

One of the most useful accomplishments young men and women can have at command, is that of Stenography. It is an easy stepping-stone

from a lower to a higher position. As a refinement, no higher one can be aspired to, and as a means of furnishing a lucrative support to all who are dependent upon their own exertion for a living, no better can be pursued. It is a branch that is becoming universally popular and attracting the attention of all classes. With the ordinary method of writing we would be unable to transact the great volume of business daily presenting itself. All the leading merchants, bankers, corporations, lawyers, and, in fact, everyone that has extensive correspondence finds it necessary to employ a shorthand writer.

The supply of good stenographers is not equal to the demand at a salary that is by no means meagre. We have secured an expert instructor for this department and insure as good instruction as can be had in any school of the country. The enrollment in this department for the past year has been beyond our highest expectations.

In addition to the regular work as done in this department the students have the privilege of enrolling in classes of Grammar and Rhetoric without additional charge.

A large portion of the correspondence pertaining to the University is carried on through this department, thereby enabling the student to become familiar with the duties of an amanuenses.

The College Chapel is provided with a "reporters' table", and all students having acquired the requisite speed are expected to report chapel orations and lectures. By this method they are given drill in reporting.

For students who do not wish to give this study their entire time, arrangements have been made whereby they can take up other studies in connection with this branch. Rates of tuition according to the time given to the study.

We have an excellent system of "lessons by mail", and those who find it impossible to attend the school can, by this means, acquire a good knowledge of this useful and fascinating study.

Type-writing is also taught in connection with Shorthand. Students have the preference of learning one or both. The demand for intelligent, skillful manipulators of the type-writer is constantly increasing, and the time is not far distant when the type-writer will be in as general use as the sewing machine of the present time. The machines used in the department are the Remington No. 2, latest make, all the recent improvements.

CERTIFICATE TO AMANUENSES AND REPORTERS.

Certificates of graduation are granted from this department to students who are capable of meeting the following requirements:

For graduation as an Amanuenses, a speed of 125 words per minute, with a speed of 60 words per minute in transcribing on type-writer.

For graduation as a Reporter, a speed of 150 words per minute, with a speed of 75 words per minute in transcribing.

COURSE OF STUDY.

FIRST TERM.—Penmanship, Book-keeping, Commercial Arithmetic, Business Correspondence, Grammar, Detection of Counterfeit Money. Rhetoric (once a week.)

SECOND TERM.—Penmanship, Book-keeping, Grammar, Commercial Law, Marking Goods, Class Lectures.

Rhetoric (once a week.)

Commercial Arithmetic.

THIRD TERM.—Penmanship, Book-keeping, Civil Government, Political Economy, Principles and Practice of Business, Banking.

Rhetoric (once a week.)

Business Spelling, Business Papers and Legal Blanks.

CHARGES IN THE COMMERCIAL COURSE.

Fall Term.....	Tuition, \$16 00	Incidental Fee.....	\$3 00
Winter Term.....	“ 13 00	“ “	3 00
Spring Term.....	“ 12 00	“ “	3 00

CHARGES FOR STENOGRAPHY AND TYPE-WRITING COMBINED.

Fall Term.....	Tuition, \$16 00	Incidental Fee.....	\$3 00
Winter Term.....	“ 13 00	“ “	3 00
Spring Term.....	“ 12 00	“ “	3 00

Type-Writing, per term.....			5 00
Book-keeping, except in Commercial Course, per term.....			5 00
Penmanship, “ “ “ “ per term.....			3 00

For further particulars address the principal,

S. E. ROBERTSON,
Baldwin, Kansas.

General Information.

LOCATION.

The institution is pleasantly located at Baldwin, Douglas County, on the Atchison, Topeka & Santa Fe Railroad. Baldwin is in the midst of an agricultural district, and the best fruit growing section in the State, and for beauty and healthfulness of location has no superior in the middle west. It is easily reached by rail, as two passenger trains pass and repass each day, making ready connection with the great through lines North, South, East and West.

The town has been improved in the past year. New residences have been erected, and more will be built the coming year. The social advantages and church privileges are very good. The mutual

relation of students and citizens is most amicable. All seek to make the stay of the students pleasant. The business interests are gradually improving. This is a desirable place for the young for educational purposes.

HISTORY.

BAKER UNIVERSITY is the oldest living educational institution in the State, having been chartered in February, 1858. Its doors were open to students in the autumn of the same year and regular work has been done every term since. Like most denominational schools, Baker has had a hard struggle for an existence; but, having survived many disasters, the friends feel that the crisis is now fully past, and the success of the last few years inspires hope for the future.

BUILDINGS AND GROUNDS.

There are two substantial buildings, located in a campus of sixteen acres, adorned with numerous trees which are making a vigorous growth, and will soon afford abundant shade.

The stone building erected some years since, is 60x80 feet; contains three recitation rooms, library and reading room, art department, two society halls, a large museum, music room, laboratory, taxidermist's room, janitors' quarters, etc.

Centenary Hall is built of stone and brick. It contains five recitation rooms, president's office, five private rooms, two rooms used by janitor, lecture room and chapel, with a regular seating capacity for nine hundred, and twelve hundred can be accommodated on special occasions.

These buildings afford facilities for giving instruction to from five to six hundred pupils. The new building has made the work of the institution much more satisfactory. The property of the college is worth, at a fair estimate, \$100,000.

GOVERNMENT.

The government of the institution is vested in the Faculty, and is adapted to the relations that exist in a college.

The students are recognized as possessing a moral sense and ideas of propriety. These are appealed to and relied upon in a very large measure. If, however, this course should fail, the authorities will resort to such measures as are adequate to secure good government.

The students are under salutary restrictions respecting social relations. The principles of honor are inculcated, and Christian courtesy encouraged. Experience has shown that with the majority this is sufficient; but with a few, other restraints are necessary. The Faculty will determine by proper rules, when necessary, the relations of the young men and women socially, and will prescribe at what times and under what conditions they may or may not enjoy each other's society.

Young ladies are forbidden to receive gentlemen callers in their

lodging rooms. and not in parlors or reception rooms at times which will interfere with study or will not be consistent with the rules of the school.

All persons boarding students will be expected to co-operate with the Faculty in enforcing such rules of the University as relate to students in boarding houses; and should there be failure to co-operate, in case of flagrant violations, the Faculty will change the place of boarding of said students. Parlors, or proper rooms on the first floor, should be provided for lady boarders to receive gentlemen callers. If such rooms cannot be provided, young ladies boarding at such places cannot receive gentlemen callers.

REQUIREMENTS.—1. Attendance at religious exercises in College chapel each day. 2. Attendance at public worship at least once on Sabbath, at such church as student or parent may select. 3. Punctual and regular attendance at each recitation. 4. Promptness at opening of term and continuance to the close. 5. Attendance on not fewer than three recitations per day, excepting Sunday and Monday. 6. Continuance in study, when taken up, for the time indicated in the catalogue. 7. Miscellaneous literary work of all students in Collegiate department. 8. Securing an excuse from some member of the Faculty for temporary absence from town. 9. Paying tuition and incidentals before entering classes.

PROHIBITIONS.—1. Defacing the buildings or furniture in any way. 2. Using tobacco in any form upon the College premises. 3. Lingering in the halls or about the buildings. 4. Dancing, card playing and gambling of every kind. 5. Visiting billiard, drinking and gambling saloons. 6. Visiting skating rinks, drinking intoxicating liquors, or even keeping them in room or elsewhere. 7. Throwing any kinds of missiles on the College premises. 8. Contracting debts without the knowledge of parents or guardians. 9. Absence from rooms later than ten o'clock at night. 10. Taking private lessons from teachers not members of the Faculty, except on permission of the Faculty.

PERMITS.—1. Variation from the rules under Requirements, may be secured from the proper authorities when satisfactory reasons are presented.

2. Variations from Nos. 8 and 9 under Prohibitions, may be secured from the President when satisfactory reasons are presented.

EXCUSES.—1. For tardiness or absence from recitation, must be made to the respective teachers.

2. For absence from Chapel or public worship, must be made to the President.

3. All tardiness or absence from recitation, church or Chapel, must be accounted for at the earliest opportunity.

4. All unexcused absences become marks of demerit, and may

result in private admonition, public reprimand, suspension or expulsion.

5. Five demerits require a private admonition from the President; ten, a written notice to parents; and fifteen, suspension from all the privileges of the University.

6. Willful violation of the rule respecting church attendance, absence from town, or absence from room later than ten o'clock, incurs a demerit of five.

EXAMINATIONS AND DEGREES.

Written examinations will be held at the close of each term. Any student being absent from examination must pass a private examination before admission to advance standing in classes. A grade below 70 in scale of 100, will require review of the branch.

The Degree of Bachelor of Arts is conferred upon students who complete the Classical course and pass a satisfactory examination in the same.

The Degree of Bachelor of Science is conferred upon students who complete the Scientific course and pass a satisfactory examination in the same.

The degree of Bachelor of Literature and Art is conferred upon those completing the course of Literature and Art and passing the required examination. Those completing the Normal course will receive a diploma from that department. Those who complete the Commercial course will receive a diploma to that effect.

LITERARY SOCIETIES.

There are four Literary Societies. Two are sustained by the young gentlemen, and two by the young ladies. They afford an excellent drill in parliamentary law, and the best usages of deliberative bodies, and give programmes open to the public once a month. The literary work during the past year has been of a superior character showing a growth in intellectual power which is encouraging.

The Societies are under the general supervision of the Faculty, but in all the details of practical work their exercises are under their own management.

SOCIETY HALLS.

Through the generosity of Mr. Fred, Trigg, the Trustees of the College were able to divide the west end of the second story in the stone building into two society halls, which thus give commodious quarters for societies that had hitherto been cramped for room. The four societies, with a spirit of energy and love for the college which cannot be too highly commended, then finished and furnished these halls. The result is that there are two halls, which for adaptability, commodiousness and beauty, are creditable to any institution. In these halls the four societies of the college meet.

EPWORTH LEAGUE.

There is a thriving Epworth League of 225 members in the church. The Tuesday evening prayer meeting, led by the President of the University, is under the auspices of this society and is a service open to all. While attendance upon this service is optional, the majority of the students and many young people of the city were present at each meeting during the past year.

THE YOUNG MEN'S AND THE YOUNG WOMEN'S CHRISTIAN ASSOCIATIONS.

The object of these organizations are sufficiently understood, so that it is not necessary to explain them. The Y. M. C. A. and the Y. W. C. A. of Baker are in excellent condition. Meetings are held every week for Bible study and other religious exercises. The members of the Association are active in their attention to strangers, new students who are in need of Christian sympathy and friendship. The Christian young ladies of the College co-operate in practical religious work, holding a Gospel service every Sabbath, and giving all encouragement to their associates to consecrate their lives to Christ.

ATHLETICS.

Athletics have always been encouraged by the Faculty and Trustees, and any movement toward stimulating the athletic sports has always been looked upon with favor. During this year quite an advance has been made in this department. Under the direction of the Y. M. C. A. an open air gymnasium has been constructed within the campus, consisting of a running track, tennis courts, proper grounds for jumping, pole vaulting, putting the shot, etc., and the usual apparatus for exercising.

Foot ball and base ball are under the management of an Athletic Association, composed of the students, which equips the teams and manages all inter-collegiate contests. Arrangements are being made for a Field Day during Commencement week which will probably be made a permanent feature of the commencement season.

ENDOWMENT.

With the beginning of the school year in 1889, proper and continuous work on Endowment was commenced. Up to that time but little had been done towards creating a permanent fund; indeed, but little could have been expected. Grounds and recitation rooms, with some equipments, were the first material requisites. In the thirty-three years of the school's history, three buildings have been erected, at an aggregate cost of \$75,000, while the whole amount of property, besides present endowment, is valued at \$100,000. It should be borne in mind that the school began with the early settlement of the state, in 1858; that the church in Kansas was at that time financially weak; that Kansas, in addition the Civil War, had also a "Border Ruffian War."

It should be remembered, too, that *time* as well as money was necessary to the establishment of a good school.

The scholarship and culture produced in Baker University had to have time to merit a standing; the social advantages and the Christian influences had to become known and unquestioned; the public confidence and favor had to be won. These things required time, but they have been well done.

The new building, Centenary Hall, was completed five years ago, making ample accommodation for six hundred students, so that the trustees now come normally and properly to the great work of Endowment. It is Endowment, and this alone, that must give a Gibraltar perpetuity to Baker University. For a year and a half an agent has been at work, and during this time \$25,000 has been secured, making the total endowment \$40,000.

IT IS NOW PROPOSED TO RAISE \$100,000. This is a reasonable and practicable undertaking. In making plans for the accomplishment of so worthy a work, certain significant and inspiring facts have been kept in mind. There are in the two patronizing conferences forty thousand members of the Methodist Episcopal Church. Each one of these members is as truly related to Baker University as he is to the society to which he belongs.

He is by the very fact of his membership as certainly obligated to give financial support to the college as to pay Vuarterage at home. Then there are besides these forty thousand members more than six thousand probationers upon whom we can rely for some support, while many friends, not members of the church, but loving the cause of Christian Education, will be glad to help.

Again, the church in this patronizing territory has never been called upon for Endowment. Probably not one out of five hundred has ever given anything for the permanent fund. The people have helped to erect the buildings; and, through the Educational Collections, have aided in sustaining the school, but now they are called upon to give it anchorage, solidity and an everlasting permanency. But the most pleasing thought, and the most valuable fact, concerning *the School is that it is accomplishing its purpose*. Its constant aim has been practical Christian scholarship, incentive to independent thought, and inspiration for a noble life. In this it has not failed.

More than a quarter of a century of work has made good its claim.

Thoughtful Christian men who know the school, believe that no investment of their money will, in the years to come, bring so large and rich results, as that given to this Endowment.

An expression of this belief is found in the \$25,000 given within the past eighteen months. Such are some of the facts which have led the management to the work of endowment with the following plan:

1st. Any charge contributing an average of one dollar per member

by March, 1892, shall have free tuition for two new students for one year. The quarterly conference of the contributing charge shall designate and recommend the student or students using said tuition. This privilege for free tuition will be open for two years from September, 1891. The charge shall have credit also for its Educational Collection.

2nd. Pledges for \$25.00 and upwards, may be put into note form, payable in five years. The interest, 7 per cent., payable June, annually.

3rd. Unencumbered real estate will be gladly received. In all cases let it be deeded to the "Kansas Educational Association of the Methodist Episcopal Church."

4th. On interest bearing or productive property vested in the Association, an annuity, if desired, will be allowed. In some cases parties have insured their lives in favor of the School. This is a good plan.

Others have made bequests in their wills. By such plans, it is believed that an adequate endowment, in the near future, can be secured. It is within the ability of the church, and not unreasonable to expect that the nearly fifty thousand members and probationers will this once in a life time, give an average of one dollar per member for Endowment. And it is as reasonable to believe that enough men and women who, with larger means, will give in cash, by note, deed or bequest, the other fifty thousand dollars, making a grand total of \$100,000.

CABINET.

During the past year through the continued liberality of friends many valuable additions have been made to the Cabinet. Especial thanks are due to Rev. C. R. Pattee D. D. for his superb collection of Pacific coast specimens. 2236 specimens have been donated. Lack of space forbids a detailed report. Contributions are as follows:

From J. and A. Bridwell, Baldwin, Kansas:

50 Oological Specimens, from Kansas.

From John Bridwell, Baldwin, Kansas:

50 Botanical Specimens, from Baldwin, Kansas.

From Wm. Foster, Media, Kansas:

1 Boulder, from Kansas.

From Dr. Chas. Reed, New Mexico:

25 Zoological Specimens, from New Mexico.

From J. F. Preshaw, Baldwin, Kansas:

1 Zoological Specimen, from Kansas.

From Rev. Moorhead, Centropolis, Kansas:

1 Ornithological Specimen, from Kansas.

From C. S. Parmenter, Baldwin, Kansas:

1 Ornithological Specimen, from Kansas.

- From J. Harmon, Chetopa, Kansas:
 20 Stone Implements, from Kansas.
- From Will Schaffner, Clay Center, Kansas:
 4 Fossil Leaves, from Kansas.
 25 Botanical Specimens, from Kansas.
- From Rev. C. R. Pattee, D. D. Los Angeles, California:
 1793 Conchological Specimens, from Pacific Coast, California.
 155 Botanical Specimens, from California.
 50 Mineralogical Specimens, from California.
 43 Zoological Specimens, from California.
 1 Whale's Vertebra Specimen, from Pacific Coast, California.
 2 Whale's Ribs Specimens, from Pacific Coast, California.
- From J. E. Mallory, Le Loupe, Kansas:
 1 Ornithological Specimens, from Kansas.
- From E. E. Hopkins, Osage City, Kansas:
 1 Stone Ax, from Kansas.
 2 Mineral Specimens, from Colorado.
- From Wm. Parsons, Topeka, Kansas:
 5 Geological Specimens, from Kansas.
- From Harrison Gossage, Baldwin, Kansas:
 2 Zoological Specimens, from Oklahoma Territory.
- From E. H. Spencer, Topeka, Kansas:
 1 Botanical Specimen, from South America.
- From Mr. Colburn, Baldwin, Kansas:
 1 Mineralogical Specimen.
- From Lyman Sullivan, Baldwin, Kansas:
 1 Mineralogical Specimen, from Lansing, Michigan.
- From R. L. Rust, Washington, Kansas:
 1 Specimen, Washington County Meteorite, Washington County, Kansas.

LIBRARY AND READING ROOM.

The library is supplied with commodious and tasteful alcoves for the circulating library, a suitable case for the reference library and an excellent supply of reading tables. The number of volumes in the two sections of the library, including public documents, bound magazines, and kindred matter, is nearly 4,000. Additions have been made during the year as follows:

By purchase, 79 vol. (mainly magazines to complete sets,) costing \$38.33

By donation from the following:

Rev. N. D. George D. D.....	121 vols.
Rev. M. V. B. Knox.....	101 "
Rev. J. M. Wilson.....	11 "
Cranston and Stowe.....	11 "

Dan'l B. Brummitt.....	3	"
Lee Cradit.....	2	"
Baldwin W. F. M. S.....	2	"
J. W. Cary.....	1	"
Columbia College.....	1	"
Cassell & Co.....	1	"

"Songs by the Wayside" by the author.

Among the papers regularly on file in the reading room are: "Forum," "Atlantic," "Popular Science Monthly," "Century," "Chautauquan," "Independent," "N. A. Review," "Public Opinion," "Puck," "Harper's Monthly," "Harpers' Weekly," "Education," "Contemporary Review," "Scientific American," "Topeka Capital," "Kansas City Daily Journal," "Kansas City Daily Globe."

In addition to these, the library is indebted to the Y. M. C. A., and several publishers who have supplied gratuitously a large number of religious, educational, news and miscellaneous periodicals.

Gifts to the library, whether of books or to the Endowment fund, are very acceptable and fruitful of much good.

There is here an excellent opportunity for some one with a comparatively small gift to relieve the library of the financial embarrassment under which it has hitherto labored, and at the same time, to carry forward the very material improvements recently made and others that are contemplated.

BAKER UNIVERSITY LECTURE ASSOCIATION.

The Baker University Lecture Association was organized October 1, 1884. It is sustained by the four College Literary Societies, and is managed by a committee of three from each Society. The course for the current year is as follows:

Rev. Chas. H. Caton, Maj. Henry C. Dane, Rev. Joseph Cook, Rev. Robt. McIntyre, Rev. C. W. Gullette, Rev. Doctor Bristol.

In addition to these lectures under the auspices of the Literary Bureau, lectures have been delivered by Bishop W. X. Ninde, Doctor Camden M. Coburn, Colonel Green, Rev. A. S. Embree and others.

Register of Graduates-Alumni.

In accordance with the announcement made in last catalogue there is herewith published a register of the Alumni, both graduate and honorary, and a list of the teachers that have had connection with this Institution. This matter is considered to be in the most accurate condition of any ever printed, and the opportunity is here taken to express thanks to those who kindly contributed aid.

However, it is recognized that inaccuracies and omissions are still present, especially in the list of teachers. This is due to the loss of certain records; and, as it is desirable to make corrections at once, will any reader, having knowledge of such inaccuracy or omission, make it known to the Secretary of the Faculty at earliest convenience.
